WORK EXPERIENCE

07.2024 - Current — University Teacher, EPI Educational Group, Tunisia

- Taught different subjects including Web Development, Algorithms and data structures, Operating systems, Linux environment, AI Fundamentals, Object-Oriented Analysis and Design for Information Systems, Software Engineering and CASE Tools.
- Committee member for judging and awarding prizes at the annual national competition Coding Moon Challenge organized by Microsoft Club.

07.2023 - 02.2024 — Mobile Applications Team Lead, Educenet, Tunisia

- Directed a team in developing mobile applications using Angular framework.
- Led integration of REST APIs, ensuring seamless communication between frontend and backend.
- Utilized Android Studio and Xcode Instruments for debugging and optimizing mobile app performance.
- Mentored developers in JavaScript, HTML, and CSS for frontend development, and Java and Spring Boot for backend development.
- Managed projects utilizing GitHub for version control and collaboration.
- Collaborated closely with stakeholders to gather requirements and define project scopes effectively.
- Cultivated a culture of innovation, encouraging exploration of emerging technologies and frameworks.
- Established performance optimization strategies, enhancing app responsiveness and user experience.
- Supervised the deployment and update of all applications on Google PlayStore, Apple AppStore and Huawei AppGallery.

02.2023 - 07.2023 — Full Stack Engineer, Educenet, Tunisia

- Designed and developed the mobile application stack for the project “9issati” using various frameworks and tools including PhoneGap, Java, MySQL, Firebase, OneSignal, CDN.
- Reduced cost and improved efficiency by solving the challenge of integrating encoded videos into the mobile app for seamless viewing.
- Collaborated with cross-functional teams to gather requirements and define technical specifications.
- Implemented RESTful APIs to enable seamless communication between frontend and backend.

03.2022 - 01.2023 — Research Assistant, SQLI Services, Tunisia

- Collaborated on the development of a carbon marketplace using Blockchain, ML and cryptocurrency technologies.

- Experimented with decentralized solutions and applications involving crypto assets.
- Conducted technological research and contributed to prototype development.
- Designed and developed the application stack for the Carbon Marketplace.

HIGHER EDUCATION

09.2021 - 12.2023 — Master of Science in Smart Systems, National School for Computer Science, Tunisia

09.2018 - 06.2021 — Engineer Degree in Software Engineering, National Engineering School of Carthage, Tunisia

09.2016 - 06.2018 — Monastir Preparatory Engineering Institute, Tunisia

CERTIFICATIONS

Mini PMP -Certificate of Completion (score 52 / 60) (BHC)

TOEIC (score 975 /990) (2021)

Version Control Certificate by Meta (Coursera)

Microsoft Technology Associate: Database Administration Fundamentals (MTA)

Cisco Certified Network Associate Routing and Switching (CCNA1)

ADDITIONAL INFORMATION

Certified First Aid Responder (Level 1).

Language Skills: Fluent in English; Fluent in French; Intermediate in German.

Tunisian Driver's license, Clean abstract.
